

F. E. WARREN AFB ENVIRONMENTAL COMMITMENT STATEMENT

ENVIRONMENTAL MANAGEMENT SYSTEM

The process by which we improve our environmental performance. This system follows a cyclical procedure of plan, do, check and act.

At FEW we strive for continual improvement by:

- Preserving our National Historic Landmark Districts.
- Conserving water to reduce costs and ensure access to clean water for our community and mission success.
- Strengthening energy resilience, security and efficiency.
- Protecting our local natural resources and waterways.
- Reducing greenhouse gas emissions and dependence on fossil fuels to support tri-state reduction goals, while enhancing military readiness.
- Maintaining critical mission functionality by inspecting storage tanks for back-up systems across missile field.

Approved by 90 MW ESOHC: 27 Sept 2023

The 90th Missile Wing is dedicated to protect the environment while fulfilling its mission to “Defend America with the world's premier combat-ready ICBM force.” Every military member, civilian and contract employee at FEW shall comply with relevant environmental laws and regulations, Executive Orders, DoD and DAF policy.

To ensure Environmental Management System (EMS) success, FEW shall:

- Integrate environmental compliance & planning with 90 MW mission at all levels of management and decision-making.
- Reduce waste generation and prevent pollution via innovation, effective facility management, and sound procurement practices.
- Maximize CFT participation by appointed organizations listed in the 90MW/CC CFT Membership Memorandum.

FEW Environmental, Safety & Occupational Health Council (ESOHC) hereby appoints 90 MSG/CD as EMS Cross-Functional Team (CFT) Chair and 90 CES/CEIE as EMS Coordinator.

For questions, contact CES/CEIE at (307)773-6607.
